Free Reign

Interface®

Open Road™ Collection

Explore nature. Embrace adaptability.

Chart your own path with infinite design possibilities. Open Road™ is a fast pass to integrating flexibility into commercial spaces.

The collection creates movement across a floor with two carpet tile styles that embrace the randomness of nature. As part of our i2™ product portfolio, every Open Road tile is varied, meaning each install is unique. It features Free Reign™, an organic style that explores pattern variation, and Come and Go™, a geometric design that experiments with color contrast. Every tile blends together effortlessly, regardless of when it was purchased or installed, supporting selective replacement and resulting in a unique, adaptable floorscape that looks beautiful now and for years to come.

These styles tap into industry-leading innovations as a part of Interface's Open platform, a toolkit of carpet tile solutions that are made to be as design-forward as they are accessible. Open products explore endless patterns and scales and deliver style and performance with every installation – all at a smart price point.

Specifications **i2**

Modular, 50 cm x 50 cm	12624
Yarn Manufacturer	Aquafil
Yarn System	100% Recycled Content Nylon
Dye Method	100% Solution Dyed
Construction	Tufted Textured Loop
Preservative Protection	Intersept®
Soil/Stain Protection	Protekt ² ™
Pile Thickness	0.086 in, 2.2 mm
Pile Density	7,953 oz/yd³
Total Recycled Content	74%
Indoor Air Quality	CRI Green Label Plus #GLP0820

Why Our Modular Flooring?

i2® Modular Carpet

Minimize waste & save money.
Interface's i2® styles have mergeable dye lots. That means i2 tiles from different dye lots always blend with tiles of the same color, even when individual tiles are selectively replaced years later. This minimizes the need for attic stock and saves money. And i2 styles that install non directionally generate an average of only 1.5% installation waste as compared to 3-4% for typical modular carpet and an average of 14% for traditional roll carpet.

TacTiles™

No glue installation. Our revolutionary TacTiles installation system eliminates the need for glue, adhering tiles securely together to form a floor that “floats” for greater flexibility, easier replacement and long-term performance. The result? Less mess, less waste and virtually no VOCs, not to mention an environmental footprint that is over 90% lower than that of traditional glue adhesives. TacTiles are approved for use on GlasBac™, CQuest™Bio and CQuest™BioX.

Intersept®

Mold protection. Our proprietary preservative, Intersept, protects our modular carpet against mold growth and odor-causing bacteria—guaranteed. Intersept treated carpet, with proper maintenance, shows no mold or bacterial growth when tested per the ASTM E2471 Standard Test Method. Intersept is EPA approved for safe use in carpet, water insoluble and contains no halogens, heavy metals, phenols or formaldehyde. Intersept is standard in Interface carpet tile products backed with GlasBac and CushionBac Renew™.

Environmental Product Declaration (EPD)

A statement of product ingredients and environmental impacts over the entire life cycle of a product. A comprehensive life cycle assessment (LCA) is performed to ISO standards to develop an EPD, after which both the EPD and LCA must be third party verified.

Health Product Declaration (HPD)

A transparency tool for evaluating whether a product supports Green Chemistry. As part of our work on Health and Materials, Interface continuously reduces the environmental and health impacts of our products through elimination of materials of concern.

CRI Green Label Plus

An independent testing program that identifies carpet and adhesives with very low emissions of VOCs to help improve indoor air quality.

NSF 140 Sustainable Carpet Assessment

The only carpet sustainability standard in North America that evaluates the environmental impact of carpet for its entire life cycle.

ReEntry™

Recyclable. Through our ReEntry program we reclaim and recycle our carpet tile and Sound Choice™ LVT. ReEntry is the only third party certified recycling system among North American flooring manufacturers.

Sustainability Transparency

Transparency and certified sustainability leadership come standard on Interface products. We enlist outside partners to help us evaluate the entire product life cycle and reduce the environmental and human health impact of our flooring. And, carpet products made in our US facilities are made with 99% renewable energy.

InterCircle Sample Return

Help us close the loop on the carpet sampling process. Through our InterCircle Sample Return program, sample materials stay out of the landfill and are re-used as samples until it is time to recycle them into new carpet. By reducing sample production material and diverting old materials from the landfill, we can reduce our overall environmental footprint.

Call 1.877.605.1500 (U.S.) or 1.866.398.3192 (Canada) to order a sample return bag with a prepaid return label.

We have tried our very best to accurately represent product colors. However, due to the nature of printed materials, color of actual products may vary slightly. Please request a sample to see actual product color.

All product specifications reflect averages derived from product sample testing, are subject to normal manufacturing and testing tolerances and inherent pattern variances, and may be changed without notice. For more information about these and other important attributes of the product(s) described herein, including recycled content and product warranty information, please see interface.com/disclaimer.
