PRODUCT
INFORMATION

This handy, lightweight tool has a wide U-shaped blade for gouging the back of vinyl or rubber cove bases to create perfect 90° corners. The blade is easily adjustable to achieve desired cutting depth, and includes dual cutting guards on either side of the blade to prevent cutting too deep. The hardwood handle is ergonomically shaped and comfortable for use. The ROBERTS® Topset Gouge offers a safer, more efficient and more accurate solution for achieving neatly wrapped corners than trimming with a utility knife.
